DESCRIPTION

- JamKast sends your streaming music to an FM channel. Just select it on the radio, and voila! You're listening to your own custom playlists, audiobooks, podcasts, or whatever else you're into.
- We've designed this tuner for simple, hassle-free use and installation.
- Just plug the connector into the device, tune your radio to the right band, and enjoy your smartphone -- no matter how dated your car is.
- The JamKast ISMFM75 plugs into your vehicle's cigarette lighter port, or 12V power port, and plugs into your iPod, iPhone, or iPad.
- JamKast ISFM75 charges your iPod, iPhone, or iPad, and takes digital audio out through the Lightning connector and transmits it to your FM radio.

INCLUDES

- ISFM31- (1) JamKast module with 12V plug and lightning connector
- ISFM75- (1) JamKast module with 12V plug and 3.5mm Audio input
- Both- (1) Instruction Manual

FEATURES

- Built in Digital-to-Analog Converter (DAC), retains digital audio signal from the Lightning connector, until just before the FM transmitter, for best sound performance.
- 2.1A charging
- dTECT auto scanning finds clean frequencies and stores them into preset memory for quick access
- Selectable FM transmission frequency, provides best performance for your listening area
