

TECH BRIEF X12LINE

Amplifiers with a “Balanced” or “Differential-Balanced” Input design will accept high-level signals from a variety of OEM head units using the RCA connection on the amplifier. This eliminates the need for a Line Output Converter in many vehicle installations using high-level input for the audio source.

**X12LINE -
RCA to Speaker Wire Adaptor
for use on amplifiers with
balanced input capabilities
(Offered in bulk packaging only)**

On PG SX2 and Ti3 Amplifiers - When the amplifier is in the OFF mode - Move the inputs switch to BAL and plug your RCA's in naturally

Simply strip the end of the Z12LINE and connect the + & - according to the printed cable housing to the + & - on your standard Stinger speaker wire.

Other Amplifier Brand & Series' that feature Balanced Inputs

Rockford Fosgate - Punch, Kicker - KX, DX & CX, JL Audio - HD, MHD & Slash V3 and many more high-end brands

Stinger is a Power Brand of AAMP Global
